

## Stephen Sanderson

### Operations Director

*Greenwood Educations Services Ltd*

### Chief Information Officer

*Greenwood Academy Trust (GAT)*

I am responsible for Information and Business Systems at GAT, delivering an IT managed service to **18,000 students** and **3,000 staff**.

I have 21 years' experience in the public and private sectors in various senior roles delivering managed and professional services to a diverse portfolio of customers across the UK.

My overall goal with OurLearningCloud is to continue to develop our Edtech platform to further enable educators and learners to collaborate and achieve safely without boundaries. We have recently completed the migration of 36 academies to our fully cloud based solution, making significant savings for the Greenwood Academies Trust and allowing their users to access applications and data from any location and across any web enabled device. My team and I are currently working on an analytics platform to deliver real time intelligence to educators and give them the tools and knowledge to make accurate early interventions with students.
